Custom Biotinylation Service.

In addition of our catalog products we offer custom biotinylation services for peptides and proteins based on our biotinylation technology that was developed for Insulin-like growth factors (IGF's) and analogs.

Biotinylated IGF's and analogs bind to antibodies, Insulin-like Growth Factor Binding-Proteins and their receptors. They are biologically active in-vitro and in-vivo. Applications are development of immunoassays, ligand based assay formats and experimental cell therapy.

The price for one custom biotinylation:

quantity between 20 ug and a maximum of 100 ug = 286.- Euro

quantity between 100 µg and 1 mg = 390.- Euro

plus VAT (VAT is applicable in Europe only) and freight cost.

It includes biotinylation of a minimum of a peptide or a protein, purification by size exclusion chromatography and lyophilization. For custom biotinylation we cannot give any guarantee on biological or other activities.
