Custom Biotinylation Service.
In addition of our catalog products we offer custom biotinylation services for peptides and proteins based on our biotinylation technology that was developped for Insulin-like growth factors (IGF´s) and analogs.
Biotinylated IGF´s and analogs bind to antibodies, Insulin-like Growth Factor Binding-Proteins and their receptors. They are biologically active in-vitro and in-vivo. Applications are development of immunoassays, ligand based assay formats and experimental cell therapy.
The price for one custom biotinylation:
quantity between 20 ug and a maximum of 100 ug = 286.- Euro
uantity between 100 µg and 1 mg = 390.- Euro
plus VAT (VAT is applicable in Europe only) and freight cost.
It includes biotinylation of a minimum of a peptide or a protein, purification by size exclusion chromatography and lyophilization. For custom biotinylation we cannot give any guarantee on biological or other activities.
For an offer of larger quantities, please use our contact form.
